

The assignment this week is another test, but of a different kind.

I want you all to take "The Global Warming Test" that is posted on the internet by our friends at the Heartland Institute (also known as Big Oil Lobby)

<http://www.globalwarmingheartland.org/GWQuiz/Testindex.html>

After taking the test (there are 10 questions in all), I want you to list your "top ten most egregiously misleading statements" in this test, along with the reasons why the statements are misleading.
